Summary

Frontend Engineer dedicated to building scalable, high-performing web applications with React, Next.js. Known for delivering pixel-perfect designs and user-centered solutions, I thrive in team environments where collaboration drives innovation. With a strong foundation in modern frontend technologies, I contribute to creating seamless, engaging experiences that align with both user needs and business goals.

Experience

EBU Computer Centre   January 2024 - September 2024

IT Instructor   Abagana, Anambra State

- Designed and delivered interactive lessons on Microsoft Office tools, empowering students with essential productivity skills.

- Utilized Google Forms to create dynamic assessments, fostering active learning and real-time feedback.

- Pioneered an after-school coding club, driving a 30% increase in student participation and enthusiasm for programming.

Identiko Integrated Solutions   April 2021 - August 2021

Frontend Developer Intern   Ikeja, Lagos.

- Collaborated with stakeholders to gather and analyze project requirements, ensuring alignment with business objectives and delivering tailored frontend solutions.

- Actively participated in team discussions, providing actionable feedback that improved user experience and streamlined development processes.

- Contributed to code reviews, identifying critical bugs and implementing solutions that enhanced code quality and maintainability.

Projects

Easyserve

🔗 https://easyserve.com.ng/

- **Collaborated** with other developers to build a **client-artisan service platform** using **React, Tailwind CSS, and Express**.

- **Implemented** a seamless **job booking and confirmation system**, enabling efficient service requests and approvals.

- **Engineered** an admin dashboard for **platform oversight**, enabling user management and dispute resolution.

Carefinder

🔗 https://carefinder-v2.vercel.app/

- **Developed a high-performance web app** with **Next.js, Tailwind CSS, and Appwrite**, enabling users to quickly find hospitals and healthcare services.

- **Implemented a search and filtering system**, allowing users to refine results based on location and medical specialties.

- **Optimized database queries and implemented pagination** to efficiently handle **2,500+ healthcare providers** without performance bottlenecks.
